PRESIDENT’S MESSAGE

“The umbrella foundation provides access to a community where you can share and grow through philanthropy.”

DENIS PITTET
PRESIDENT OF
THE FOUNDATION

An umbrella foundation associated with the Lombard Odier Group and a registered charity, Fondation Philanthropia has been helping its donors implement their philanthropic projects since 2008. We provide support to anyone who wishes to develop a philanthropic project in keeping with their traditions, desires and ambitions. The Foundation offers its donors a legal, financial and philanthropic framework for made-to-measure projects.

In 2024, the Foundation had the opportunity to create five new funds. One of these, the Franz E. and Radmila Muheim Fund for the Fight Against Torture, will enable us to significantly expand our activities in the field of human rights, thanks to the provisions made in the will of by the founders some fifteen years ago. Following numerous discussions with them, we will be able to provide long-term, meticulous and attentive support for the activities of partners such as Amnesty International Switzerland, the Swiss Red Cross and the World Organisation Against Torture (OMCT).

Our donors also remain committed to the fight against cancer, the greatest health challenge of our time. According to the Union for International Cancer Control (UICC), nearly ten million people die from cancer every year. The fight against the disease involves prevention, early diagnosis, increasingly personalised treatments and palliative care. To illustrate the results of our role as an intermediary, this report highlights the remarkable work of our beneficiaries in French-speaking Switzerland, Europe and worldwide.

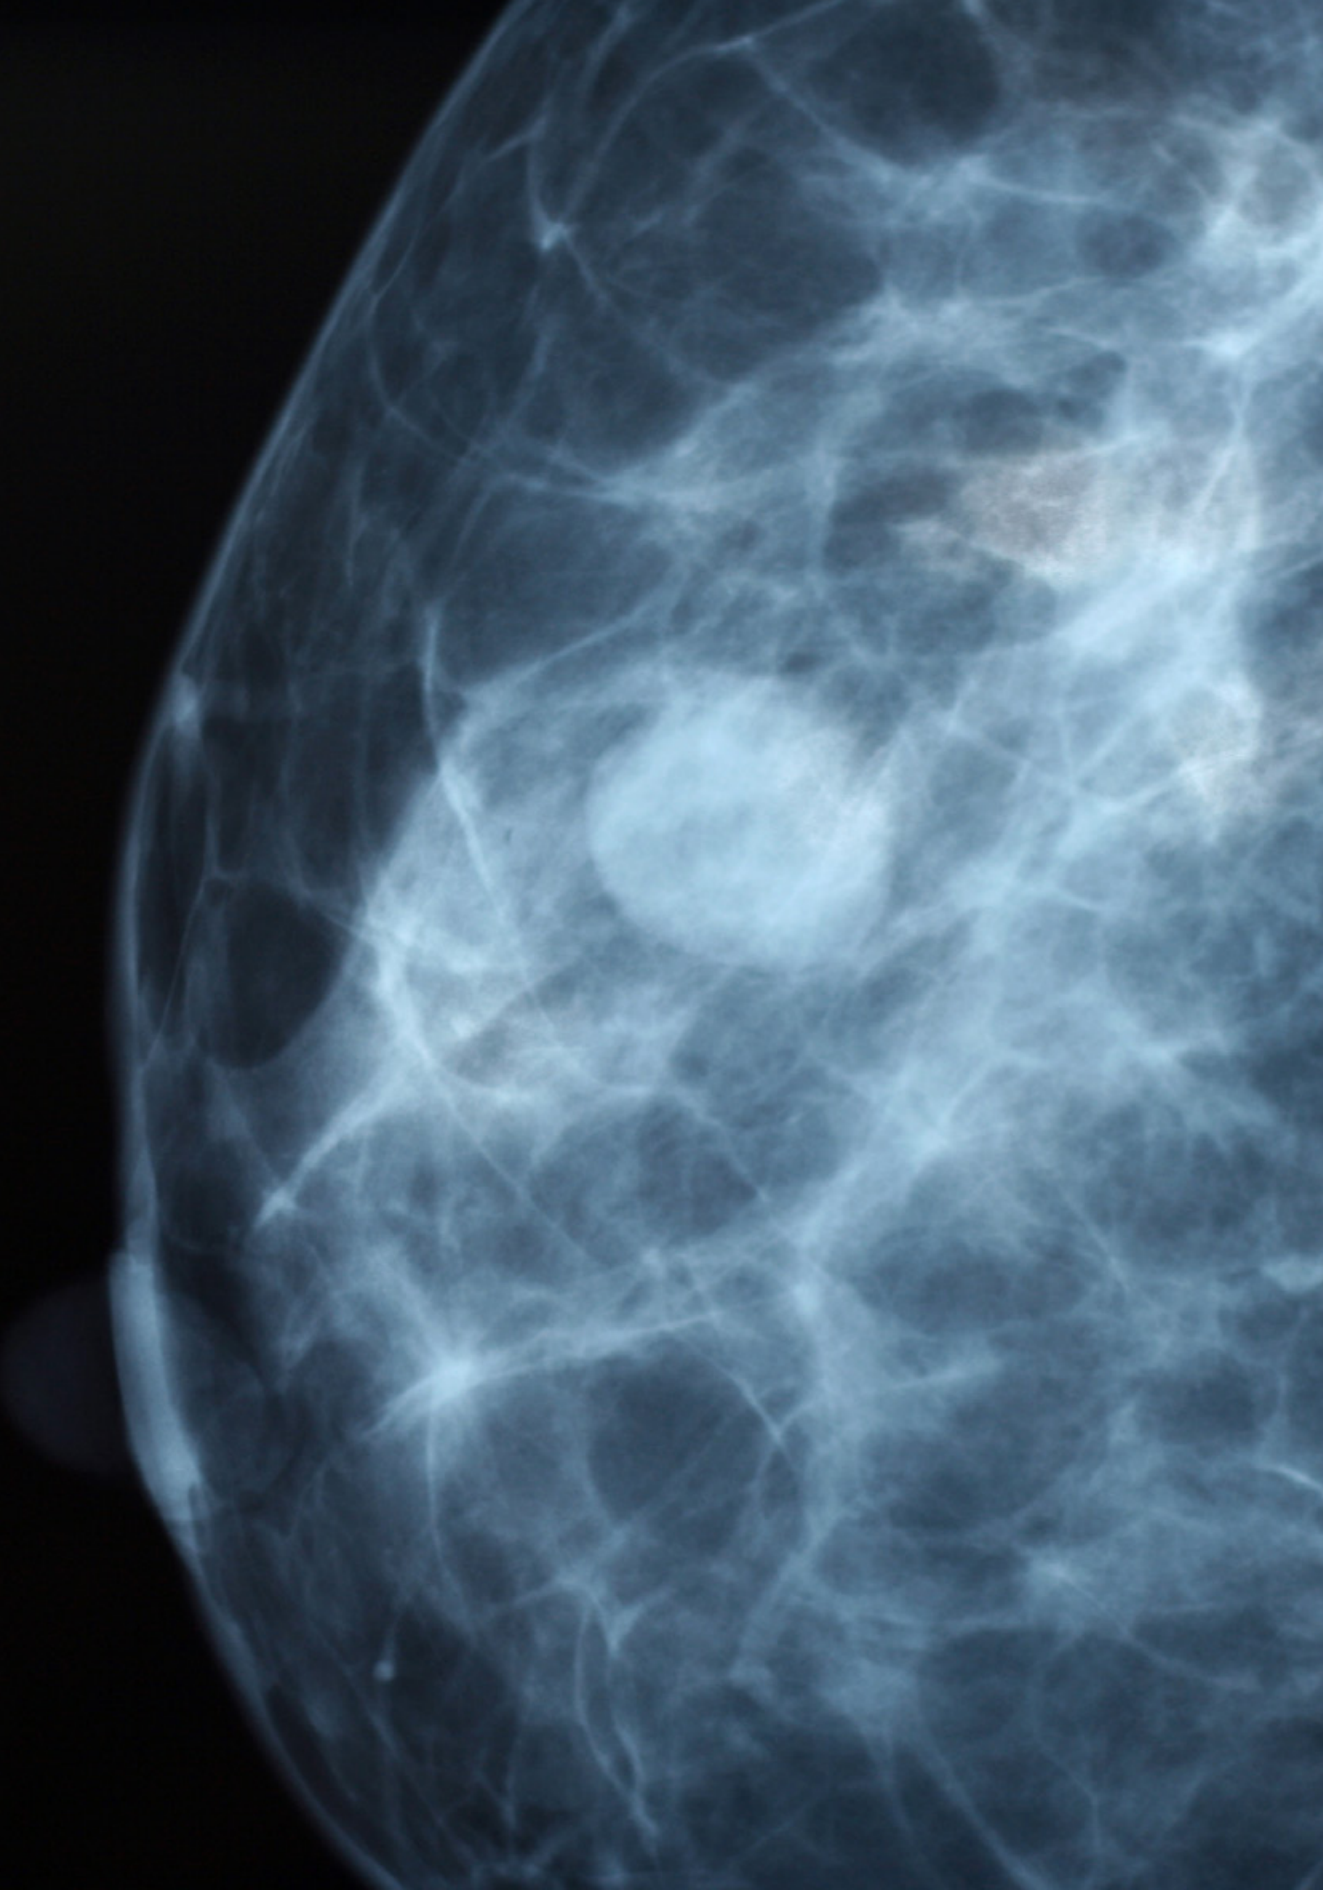

However, our efforts to support donors would be nothing without concrete collaboration with our peers and the non-profit sector. A prime example of this is the co-financing of the *Guide to Association Management*, an initiative led by the Arcanum Foundation, which helps Swiss non-profit organisations to strengthen their capacity for action and their professionalism in areas as diverse as human resources management, financial management and project management. This guide is a valuable addition to the regular support our donors provide to the philanthropic sector.

I would like to extend my thanks to them once again!

As Nelson Mandela said, “We must use time wisely and forever realise that the time is always ripe to do right.”

“NINE-TENTHS
OF OUR HAPPINESS
DEPENDS UPON HEALTH
ALONE. WITH HEALTH,
EVERYTHING IS A SOURCE
OF PLEASURE...”

ARTHUR SCHOPENHAUER

PHILANTHROPIA TODAY

161 mn

sheltered funds*

Fondation Philanthropia was created in response to the fact that many people were looking for a quick and easy solution to structure their philanthropic projects, without having to choose to create an independent grant-making foundation, a solution that is often time-consuming and costly, not to mention complex in terms of legal liability.

As an individual donor, a family or a group of friends, weighing up all the options can be overwhelming. The role of the Foundation's advisory team is to discuss your aspirations and provide the necessary guidance, before connecting you with the right partners. Drawing on their expertise in advising donors who wish to make a significant contribution to a cause they hold dear, the advisory team is also Lombard Odier's Philanthropy Services team.

Since the Foundation was established, many donors have wished to commit their financial resources to the fight against cancer.

For more than 15 years, over a quarter of donor contributions have been allocated to this cause.

The Foundation provides ongoing support for projects in the fields of medical research, support for people living with cancer and their carers, and advocacy for the fight against the disease. On pages 22 to 27, we provide an update on some of the projects currently under way.

A BEQUEST DEDICATED TO THE FIGHT AGAINST TORTURE

“Torture is a crime, always, everywhere, in all its forms.”

Robert Badinter

Torture is strictly prohibited under the [United Nations Convention against Torture and Other Cruel, Inhuman or Degrading Treatment or Punishment](#) (1984), but it continues to be practised in many countries.

Torture and other forms of ill-treatment are illegal under international law, and the international community is united in its condemnation of them. However, whether in detention centres or elsewhere, these practices remain a reality.

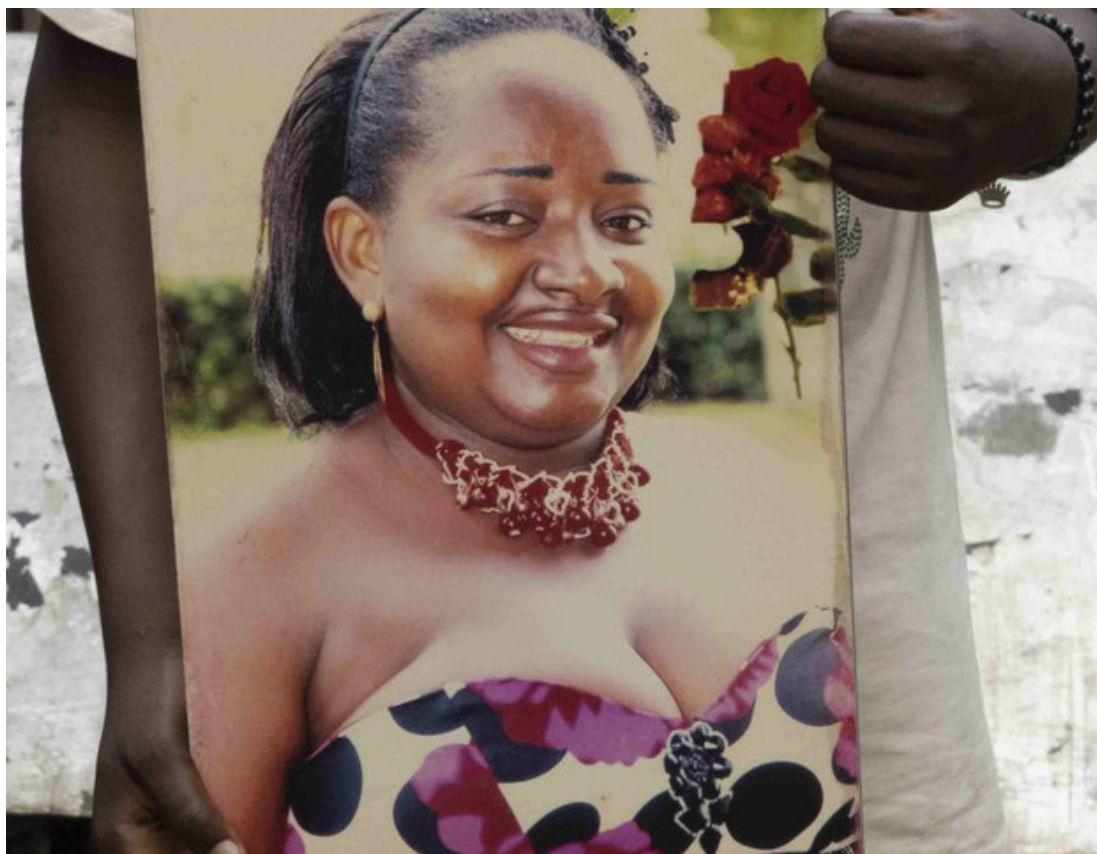

Thanks to a bequest received from Mr. Franz E. Muheim and his wife, Radmila, in 2024, Fondation Philanthropia will be able to support non-governmental organisations committed to combating torture and supporting its victims for the next 20 years. The couple had approached the Foundation some fifteen years prior to discuss the framework for a sheltered fund that would be activated upon their death and dedicated to this cause, which was close to their hearts. In their wills, they named the Foundation as heir and drew up the fund’s regulations in advance, defining precisely the scope of the fund’s activities and their philanthropic legacy.

“I will never cease to be outraged, to the core of my being, by the brutal determination of human beings to humiliate other human beings, to inflict suffering on them that goes beyond what is imaginable. [...] Committing to the fight against torture is an indispensable, Sisyphean task, but we must not let ourselves be discouraged. As Robert Badinter powerfully stated, “Torture is a crime, always, everywhere, in all its forms. It is a crime against humanity that is made manifest in every person who is tortured.”

Franz E. Muheim (2019), *Traces d'un passant*, Bière: Editions Cabédita, p. 135.

Franz Muheim attended secondary school in Bern and then studied humanities in Fribourg, Geneva and Paris (1952-1956). He joined the Federal Political

Department in 1960 (renamed the Federal Department of Foreign Affairs – FDFA in 1979) and, until 1971, carried out missions in Belgrade, Rabat and London. Muheim continued his career as department head within the Council of Europe (1971-1973), chief of the United Nations and International Organisations Section (1973-1978), first assistant to the Swiss ambassador in Washington (1978-1981), deputy director of the Political Directorate and head of Political Division I (Europe and North America) in Bern (1982-1984), head of the International Organisations Directorate of the FDFA (1984-1989) and lastly, ambassador in London (1989-1994). A Fellow of Harvard University (1981-1982) and Professor at the Bologna Centre of Johns Hopkins University (1995-1996), Muheim was also President of the Swiss Red Cross from 1996 to 2001.*

Dorgelesse Nguessan, a young woman from Cameroon, has finally been freed. After over four years of arbitrary detention for having participated in a protest, she is at last reunited with her son. Amnesty International and its Global Relief Programme intervened to secure her freedom.

The Foundation regularly engages in discussions with donors wishing to dedicate all or part of their inheritance to philanthropy, supported by a professional and efficient structure. Named as the heir

to a bequest, Fondation Philanthropia guarantees the continuity of their philanthropic ambitions and the way in which they will be achieved.

Thanks to our privileged access to wealth planning experts, we are able to offer complete support to anyone wishing to make a bequest to Fondation Philanthropia, from drawing up the will to structuring the sheltered fund to be activated at the time of the donor's death.

PARTNERSHIP WITH THE ARCANUM FOUNDATION

“Managing a non-profit requires from its leadership a full understanding of its interactions.”

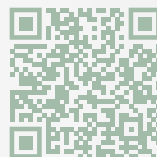

Active in the canton of Fribourg and in Africa, this Swiss grant-making foundation is heavily involved in developing the capacity of its beneficiaries. It makes targeted investments in the processes and structures of its partners to improve the effectiveness of these organisations.

This approach is shared by Fondation Philanthropia. In 2024, the Foundation worked with a group of donor foundations to update and republish the *Guide to Association Management*.

Ten years ago, after noting that no comprehensive guide to managing a non-profit organisation existed in French, the Arcanum Foundation published a practical guide in 2015 designed to support people with responsibilities within associations or foundations in their valuable work. This practical manual for the day-to-day management of associations has since been revised and a fully up-to-date version has been available since 2024.

Since June 2015, more than 100,000 people have downloaded the Guide. The current French version can be downloaded free of charge [here](#).

Download the Guide

“LIFE CAN STILL BE
CHANGED AT ANY TIME
WITH A GREAT DEAL
OF CARE AND KINDNESS.”

PHILIPPE JACCOTTET, *L'ENCRE SERAIT DE L'OMBRE*

THE ADVANTAGES OF OUR UMBRELLA FOUNDATION

THE IMPACT OF EACH GRANT IS MULTIPLIED

Fondation Philanthropia's structure allows private donors to pool their funds with other donors to support projects that would have been inconceivable without being able to share the costs. The impact of each donation is thus multiplied.

Within these structures, donors can create their own personal space – or “sheltered fund” – which operates in a very independent manner, and benefits from the economies of scale produced by the umbrella structure.

Philanthropia provides all the administrative, accounting and legal services required, so donors are free to focus exclusively on their philanthropic causes in full confidence.

Philanthropia can help you achieve your philanthropic ambitions with the added assurance of simplicity, security and tailored solutions that are precisely aligned with your objectives.

YOU CAN CHOOSE BETWEEN TWO OPTIONS

THEMATIC FUNDS

These funds are perfect if you want a swift and straightforward solution. They allow you to operate alongside other donors to support projects and organisations in one of the following five areas:

HUMANITARIAN AND SOCIAL ACTION

MEDICAL AND SCIENTIFIC RESEARCH

THE ADVANTAGES

- Compliance**
 In an increasingly complex legal environment, it is vital to ensure that the right procedures are followed and changes made.
- Choice**
 The profile of the fund is adapted to the organisation's needs (long-term funds or funds with disposable capital, regular donations or bequests, etc.).
- Flexibility**
 To accommodate an existing project or support a new one.
- Network**
 Access to a network of donors and the sector's trading platforms.

EDUCATION AND TRAINING

ART AND CULTURE

ENVIRONMENT AND SUSTAINABLE DEVELOPMENT

Fondation Philanthropia is committed to selecting with you the most relevant projects to maximise the impact of your donation. For each project, we monitor every grant made and report to you on the results achieved.

SHELTERED FUNDS

These funds are the right solution if you have already identified the cause or project you wish to support. This option allows you to create your own fund, which then operates as a quasi-independent entity within our umbrella structure. If you wish, you can involve your family and friends by forming a consultative committee to submit grant recommendations to the Board of Fondation Philanthropia. You can also work directly with our philanthropy advisers, who will help you define a grant strategy and select those projects that best suit you.

This option is also suited to existing foundations wishing to reduce their administrative overheads, while retaining a board that plays an active role in the grant-making process.

Forty-seven donors have already created their own personal fund within Fondation Philanthropia. Each of these funds is active in different areas, according to the sensitivities and preferences of each founding donor.

IN FIGURES

Donors have created their own fund within Fondation Philanthropia

BESPOKE ASSET MANAGEMENT

Management of the Foundation’s capital providing all the necessary security guarantees for the fulfilment of our donors’ commitments.

Fondation Philanthropia makes substantial grants every year. Given the Foundation’s distribution policy, the low level of returns currently available and the volatility of financial markets in recent years, the Board of Trustees has decided to adopt a management policy based on a financial planning model aimed at providing long-term protection of assets. This policy divides assets into three distinct sub-funds on the basis of a forecast distribution time horizon. Each sub-fund has a specific investment strategy designed to achieve set targets for return on investment and risk management.

RESPONSIBLE INVESTMENT CHARTER

In order to align the investment strategy more closely with the Foundation’s objectives and missions, the Board adopted a responsible investment charter aimed at generating financial returns while having a positive impact on society.

The charter is based in particular on the Principles for Responsible Investment (PRI) initiative launched by investors in partnership with the United Nations Environment Programme Finance Initiative and the United Nations Global Compact. The management approach is based on negative selection criteria (exclusion of certain unethical sectors of activity), positive selection criteria (Environment, Social and Governance [ESG] ratings and controversy scores), and investments with a social and environmental impact.

COSTS

Philanthropia offers a competitive and advantageous cost structure. All administrative, accounting, legal and philanthropic costs, excluding asset management, are set at:

CAPITAL	FIXED RATE	+	PERCENTAGE OF AVERAGE FUND ASSETS OVER THE YEAR
CHF <1 mn	CHF 5,000.-		/
from CHF 1 mn to <5 mn			+ 0.50%
from CHF 5 mn to <10 mn	CHF 3,500.-		+ 0.35%
from CHF 10 mn to <25 mn			+ 0.20%
over CHF 25 mn		custom rate	

THE BOARD OF TRUSTEES

Our Board of Trustees guarantees that Fondation Philanthropia is correctly managed at all times. It takes particular care to ensure that its missions are fulfilled in compliance with all the provisions agreed with each of our donors.

Its members have complementary profiles and are all personally committed to the philanthropy sector. The Board meets each quarter to discuss current issues, analyse projects and approve decisions taken by the Foundation, ensuring that they are consistent with the intentions and wishes of our donors.

BEATING CANCER: PROGRESS IN SEVERAL AREAS

AMPLIFYING EFFORTS TO ADDRESS CANCER: THE DIGITAL TRANSFORMATION OF UICC

THE CHALLENGE:

In 2022, there were an estimated 20 million new cases, and close to 10 million deaths from cancer. UICC is the largest international membership organisation focused on cancer, with a membership base of over 1150 organisations in 172 countries and territories and territories, including the world's major cancer societies, treatment centres, hospitals, ministries of health, public health agencies and patient support groups. Through its flagship events, such as the bi-annual World Cancer Congress (WCC), day-to-day engagement with its members, and learning and development opportunities, UICC unites and supports the cancer

community to reduce the burden and impact of cancer around the world.

Seizing the opportunity of the digital evolution to amplify the value and reach of support, UICC has steadily increased the virtual engagement of its community via digital platforms, including to accompany in-person events, enhancing the experience of UICC's online courses, and offering 'Virtual Dialogues' to keep the community connected. The latter, introduced during the Covid-19 pandemic, have now become a regular virtual convening platform, bringing key topics in cancer to the attention of a wide audience and allowing individuals to regularly learn and

KIRSTIE GRAHAM, DIRECTOR, CAPACITY BUILDING, UNION FOR INTERNATIONAL CANCER CONTROL

What were the key achievement of the 2024 World Cancer Congress and why?

The WCC is one of UICC's flagship convening events, a bi-annual conference first launched in 1933. In its 2024 edition in Geneva, the event welcomed 2,000 participants from 122 countries. The WCC brings together the full spectrum of the cancer community (academia, clinicians, policy-makers, private sector, advocates and those with lived experience of cancer), all committed to reducing the impact of cancer. One story that truly exemplifies the opportunity of collaboration, and the value of these convening platforms to drive change, is between the University Hospitals of Geneva (HUG) and the National Cancer Center of Mongolia. In 2022, the HUG was approached by a Mongolian delegation interested in a collaboration. At the Congress in 2024, they signed a Memorandum of Understanding to facilitate knowledge exchange and internships, training doctors in advanced surgical techniques.

In concrete terms, how will the cancer control community worldwide benefit from your digital transformation?

Over many years, UICC has been building the value of its flagship in-person events, ensuring they serve as effective opportunities and critical milestones for knowledge exchange and networking for the cancer community. UICC's digital transformation seeks to complement these events, enabling continuous and autonomous access to the community throughout the year, further facilitating the sharing of expertise, training opportunities and resources, and bringing increased opportunities for learning, connection and collaboration.

uicc.org

share. Since their launch, UICC has reached close to 3,000 cancer professionals, engaged over 1,000 organisations, across 70 sessions. However, a significant opportunity remains to move from ad-hoc and distinct engagement opportunities to a digital platform that supports comprehensive and continual access to the community.

THE IDEA:

The ambition was to create a virtual ecosystem for the global cancer community, enabling individuals and member organisations worldwide to connect to each other directly, share learning, and collaborate. This initiative represented a step change in the operational model of UICC, to exponentially amplify UICC's impact and the value of UICC membership to organisations, democratising access to the network, learning and collaboration opportunities. Previously, requests for support or connections were facilitated but limited by the capacity of a small team based at UICC's offices in Geneva, and the extent of staff networks.

THE RESULT:

UICC Connect was publicly launched as part of UICC's 90-year anniversary celebrations in 2023 and subsequently opened to all UICC members at the WCC, held in Geneva in September 2024. Since then, engagement with the platform has been growing, with over 200 new accounts created by end 2024, taking the total number of accounts to 700. At that time, approximately 270 member organisations had one or more staff signed up to the platform, with an average of 164 users logging-in on a monthly basis.

UICC is now investing significantly in extending the reach and utilisation of the platform by the cancer community, across all geographies and settings, to help ensure that the collective power of the community can be fully harnessed to save and improve the lives touched by cancer.

GUSTAVE ROUSSY'S INTERCEPTION PROGRAMME: PREVENTING AND SCREENING FOR CANCER IN THOSE MOST AT RISK

THE CHALLENGE:

Cancer remains a major cause of death and a public health issue. Despite progress, current screening approaches have their limitations: moderate uptake, risks of false positives and insufficient primary prevention. A rapidly developing strategy is precision prevention, involving screening and personalised risk-reduction measures tailored to individual risk. Around 40% of cancers occur in people who could have been identified as being at increased risk a few years prior to diagnosis. Detecting these profiles makes it possible to act upstream and implement specific preventive measures, paving the way for a reduction in the risk of cancer, or at least of serious cancer.

THE IDEA:

Designed by Gustave Roussy, the world's fourth-largest oncology centre, Interception is revolutionising cancer prevention. Already deployed in six French centres, the programme targets people at increased risk of cancer. The Gustave Roussy teams are working to develop innovative digital tools to democratise prevention and reduce

the incidence of preventable cancers. Since June 2024, the digital platform has been supporting people at risk at every stage of their treatment: data collection, algorithms, information and education, and long-term monitoring of their personalised recommendations. Using artificial intelligence and genetics, the aim is clear: to shift from late detection to active anticipation, to maximise the chances of avoiding the disease or treating it early, thereby changing the prognosis.

THE RESULT:

Since 2021, Interception has already allowed thousands of people identified as being at increased risk of cancer to benefit from personalised support. Thanks to the digital platform, an even wider audience will be able to access online assessments and tailored prevention programmes. This project marks a transformation of the cancer care model, moving from a reactive approach to a proactive strategy. The impact is tangible: cancers detected earlier, enhanced prevention and, ultimately, a significant improvement in survival rates and quality of life for patients.

DR. SUZETTE DELALOGUE, DIRECTOR OF THE INTERCEPTION PROGRAMME

Ultimately, what concrete impact will Interception have on people at risk of cancer?

I am convinced that the future of the fight against cancer lies in prevention and screening tailored to each individual. By identifying people at increased risk at an early stage and offering them personalised treatment, we can change the courses of thousands of lives. In the long term, this approach will also relieve pressure on an already strained healthcare system. Our ambition is to make prevention a reflex accessible to everyone, using simple, high-performance digital tools.

gustaveroussy.fr

Do you think it is possible to extend personalised prevention and screening to everyone and for all forms of cancer?

Yes, because while certain forms of cancer already benefit from targeted preventive strategies, scientific and technological advances will enable us to extend this approach. Artificial intelligence, genetics and new screening methods are paving the way for personalised prevention for all, in addition to the essential prevention needed to protect all citizens from major health risks. This requires a collective commitment, appropriate resources and effective communication to encourage everyone to take responsibility for their own health. At a time when the rate of cancer, particularly among young adults, is rising steadily, it is crucial that we rise to this challenge together.

INTEGRATING ARTIFICIAL INTELLIGENCE IN PRECISION ONCOLOGY – THE RÉSEAU ROMAND D'ONCOLOGIE

THE CHALLENGE:

In Switzerland, more than one in five people develop cancer before the age of 70. As Switzerland prepares to face a veritable epidemic due to an ageing population and an increase in the number of cases among people under 50, it is vital to improve the way people are cared for, refine diagnostic methods and develop precision oncology.

Targeted therapies and immunotherapy offer new prospects for cancer patients, and represent a challenge for personalised oncology, as choosing the right therapy requires the analysis of an increasingly complex set of data. Transforming this raw data into knowledge that can predict which patients will respond to which treatments is a key challenge.

THE IDEA:

The Réseau Romand d'Oncologie (RRO – Oncology Network in French-speaking Switzerland) was created in 2014 as a joint initiative of the Geneva University Hospitals (HUG) and the Lausanne University Hospital (CHUV), with the aim of pooling the expertise and resources of public and private institutions in the Lake Geneva region to ensure more comprehensive and effective care for cancer patients.

One of the cornerstones of this network is the possibility of presenting patient files to a Molecular Tumor Board, a multidisciplinary symposium attended by experts from several disciplines. Since 2017, more than 4,000 people have been treated by the Réseau Romand d'Oncologie.

THE RESULT:

The RRO has developed a high-performance infrastructure incorporating artificial intelligence to offer customised immunotherapies to cancer patients. In particular, the use of new technologies enables the development of complex biomarkers and the introduction of extended RNA* and DNA** analysis in a clinical context.

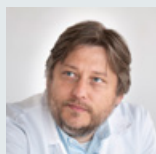

Thanks to the Molecular Tumor Board and recent developments in data analysis, the CHUV has been able to initiate several clinical trials based on patients' genomic profiles.

* Ribonucleic acid essential for transporting genetic messages and synthesising proteins.

** Deoxyribonucleic acid found in the nucleus of living cells, an essential component of chromosomes and the carrier of genetic characteristics.

Tumor board of medical experts in French-speaking Switzerland

DR. KRISZTIAN HOMICKO, CLINICAL HEAD OF THE DEPARTMENT OF MEDICAL ONCOLOGY AND HEAD OF THE MOLECULAR TUMOUR BOARD AT THE CHUV.

What are the advantages of calling on experts from several disciplines to select cutting-edge treatments?

The Réseau Romand d'Oncologie is a valuable resource for any oncologist responsible for people living with cancer. The RRO offers a unique platform for discussion and interpretation of complex molecular data to facilitate the therapeutic management of patients. It makes it possible to offer them cutting-edge therapeutic solutions, while respecting the close relationship they have with their GP.

It's a real team effort, with specialists – oncologists, pathologists, bioinformaticians, geneticists – working hand in hand to offer personalised medicine to each patient.

What long-term benefits can we expect from the use of artificial intelligence (AI) in oncology?

Oncology, particularly molecular oncology, is becoming increasingly complex with the emergence of new analytical tools that generate a phenomenal amount of information for each individual. This biological resolution, combined with precise clinical data, will allow AI to develop personalised predictive models for each individual. In the future, the development of new approaches for clinical studies will be based on AI, with the hope that the clinical research process based on numerous failures will be replaced by more efficient and highly personalised development. This will not only increase the benefits for patients, but also reduce the cost of developing new drugs.

www.chuv.ch www.hug.ch

PROJECTS SUPPORTED

EDUCATION AND TRAINING

SWITZERLAND VEREIN LIGHT FOR ALL

Purchases to support the activities of the Egyptian organisation “Little Flock”. The equipment will be used in an educational centre for disabled children from disadvantaged backgrounds in Bani Mazar, Upper Egypt.

DEMOCRATIC REPUBLIC OF THE CONGO GEORGES MALAIKA FOUNDATION

Project providing education for girls in the Kalubeka region, Katanga, Democratic Republic of Congo. The organisation also provides a community centre so that adults can benefit from certain types of training and come together in a positive environment.

GREECE METADRASI

Scholarship granted to a refugee accompanied by this Greek NGO dedicated to helping migrants.

* Non-exhaustive list

SWITZERLAND
EHL FOUNDATION
FOR SCHOLARSHIPS
AND HONORARY LOANS

Four-year contribution (2022-2025) to the scholarship fund of the EHL Hospitality Business School, founded in 1893 as the Ecole Hôtelière de Lausanne.

CAMBODIA
AGIR POUR LE CAMBODGE
(APLC) – SALA BAI

Scholarship funding for hotel management school students in Siem Riep

BROCKWOOD
PARK SCHOOL

Support for the scholarship programme at the school, a member of the Krishnamurti school network.

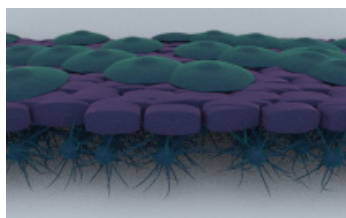

SWITZERLAND
MARC BIRKIGT
SCHOLARSHIP - UNIVERSITY
OF APPLIED SCIENCES AND
ARTS, GENEVA (HEPIA)

Distribution of a scholarship to an engineering student at the University of Applied Sciences and Arts, Geneva (HEPIA).

MEDICAL AND SCIENTIFIC RESEARCH

RARE
DISEASES
INTERNATIONAL

Parkinson
schweiz suisse svizzera

SWITZERLAND FONDATION EGON NAEF

The E. Naef Foundation for in-vitro research supports scientists who develop efficient substitutes to animal experiment. A two-year partnership with the **Carlo Fund** of Philanthropia provides a prize for researchers with demonstrated breakthrough in this field.

INTERNATIONAL RARE DISEASES INTERNATIONAL

Support for the development of the advocacy work carried out by the rare disease umbrella organisation (in partnership with the Fondation de Luxembourg).

SWITZERLAND PARKINSON SUISSE

Support provided by the **Gustaaf Hamburger Fund** for the publication of the quarterly magazine and the association's solidarity fund.

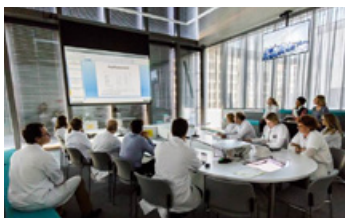

FRANCE
GUSTAVE ROUSSY

Support for the oncology fellowship programme and the Interception programme (2022-2024), an interactive digital platform to support an innovative cancer prevention model.

SWITZERLAND
FONDATION OTIUM

Support for the installation of a care centre in Geneva, which aims to provide practical and psychological support to patients living with cancer and their families, while ensuring their physical well-being in a warm and welcoming environment.

SWITZERLAND
RESEAU ROMAND
D'ONCOLOGIE (CHUV, HUG)

Renewed support provided to the care network in French-speaking Switzerland through the integration of artificial intelligence for precision oncology.

HUMANITARIAN AND SOCIAL ACTION

SWITZERLAND
CIVITAS MAXIMA

General support for the NGO that facilitates the documentation of international crimes and seeks reparations on behalf of victims who are unable to assert their rights.

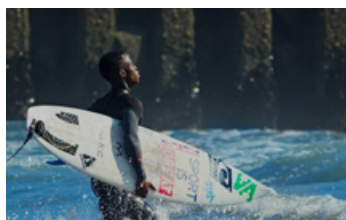

SWITZERLAND
ASSOCIATION PROVIDE THE SLIDE

Support provided via the **Smile Wave Fund** for an initiative to collect second-hand surfboards for use by clubs in Western Africa.

SWITZERLAND
SWISS FOUNDATION IN SUPPORT OF HUMAN RIGHTS WATCH

Unrestricted support for the human rights advocacy organisation.

SOUTH AFRICA
SURFERS NOT STREET
CHILDREN

Organisation for street children in Durban, founded by a social worker. Receives support from the **Smile Wave Fund** to improve conditions and equipment in the organisation's welcome centre.

VIETNAM
BLUE DRAGON CHILDREN'S
FOUNDATION

Pilot programme providing psycho-social care for abused children.

SWITZERLAND
ASSOCIATION ASYLEX

General support for the provision of legal aid for asylum seekers in Switzerland.

THAILAND
LABOUR PROTECTION
NETWORK

Unrestricted support from the **Smile Wave Fund** to an NGO that defends the rights of sea workers and fights against the enslavement of fishermen by industrial fleets in South-East Asia.

**ASSOCIATION DES AMIS
DU VERBIER FESTIVAL**

General support for the music festival
and musicians.

A WORD OF THANKS

Our aim in this report was to highlight the work done directly in the field by our partners. We would like to take this opportunity to thank them sincerely for the quality of their work and their projects.

Our donors are thus able to fully quantify the impact of their generosity, which has contributed to changing the fate of humankind all over the world.

We cannot consider unsolicited funding requests from associations. Thank you for your understanding.

Since the mission of Fondation Philanthropia is to serve the philanthropic ambitions of its donors, we adopt a purely proactive approach to identify projects that meet their personal interest areas.
